Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "handle of linearly elongated cylindrical configuration" must be shown or the feature canceled from the claims. No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-7 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Specifically, the working relationship of the linkage arms with respect to the operating rod is not understood. Applicant should note the operating rod of figure 6. Loop "53" is a *unitary element* of the operating rod. In figure 1, operating rod "50" is fixedly attached to the handle "20" via bolt "62" (presumably at loop "53"). It is not apparent therefore, how the metal operating rod can have vertical movement and in turn actuate vertical movement of the linkage arm "60", as stated on page 10 of specification, lines 1-7. In short, with the design of the operating rod as shown in figure 6, the ability to move linkage arms 60 is impossible.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 13 and claim 7, line 17 claim "a movable linkage arm" while there is a prior mention of the phrase. Each distinct limitation is required to have an exact nomenclature and subsequent reference to the limitation should be preceded by "said" or "the". The lack of clarity renders the claimed subject matter indefinite.

6. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: the connection between the movable linkage arms and the claw appendages.

Response to Arguments

7. Applicant's arguments with respect to all claims have been considered but are moot in view of the new grounds of rejection.
